

Senior eCAP® Account Manager jrichards@augustmack.com

Jennifer serves as Senior eCAP® Account Manager for eCAP® Services in the August Mack Environmental, Inc. Indiana office. She has over 13 years of experience in environmental consulting. She has developed her career at August Mack providing assistance with environmental regulatory compliance for a wide range of industrial facilities, as part of August Mack's eCAP® (Compliance Assurance Program). Her specialized experience includes developing, implementing, and maintaining environmental management programs to ensure compliance with applicable federal, state and local regulations is demonstrated. Tasks associated with the eCAP® program include: compliance audits, routine inspections, management of personnel, training, regulatory agency interaction as well as report and permit preparation and evaluation.

Project Experience:

- Completed over 40 Superfund Amendments and Reauthorization Act (SARA) Section 312 (Tier II Chemical Inventory) and Section 313 (Toxic Release Inventory) reports. Tracked the disposition, conducted chemical inventories, storage, or usage quantities of certain hazardous substances through the development of comprehensive spreadsheets. Each report that was completed had a detailed methodology which included any assumptions, exemptions, and calculations used.
- Account Manager for 18 industrial facilities. Managed environmental management system through August Mack's eCAP® for tank manufacturer with a Title V major source facility. Tasks included ensuring compliance with Title V permitting, storm water permitting, Spill Prevention Control and Countermeasures, SARA Section 311/312/313 reporting, and, hazardous waste Large Quantity Generator requirements. Tasks included coordinating compliance tasks with facility personnel, preparing emission calculations, updating plans, preparing required reports, and tracking disposition of chemicals and wastes.
- Conducted facility site inspections to ensure compliance with all applicable local, state and federal environmental laws. Explained regulations to industry officials, business owners and citizens. Reviewed permit requirements and conducted multi-media inspections to ensure compliance with permit conditions.
- Developed health and safety plans and programs for multiple facilities, which included personal protective equipment plan, respiratory protection plan, hearing conservation plan, and confined space entry program which were developed in accordance to the Occupational Health and Safety Administration (OSHA) regulations.
